

Fayez Spa – London's only accredited 5-Star Spa

It should be no surprise to regular clientele that Fayez Spa was recently accredited as a 5-Star Spa following the extensive inspection protocol by an independent team of inspectors.

The recent secret shopper inspection by 5-Star Spas of Canada resulted in Fayez Spa's designation as an accredited 5-Star Spa, the most recent addition to this spa's list of prestigious honours.

Fayez Tamba's commitment to exceed clients' expectations is the foundation of his spa's 29-year success. Fayez also attributes the spa's growth and evolution to delivering treatments and services by 45 of London's very best aestheticians, therapists, and stylists, as well as responding to clients' needs. In addition to creating and sponsoring the Annual Nursing Excellence Award, Fayez Spa contributes to a wide variety of charitable fundraisers every year. He also suspects that the coveted birthday gifts he awards to his loyal clientele play an important role in their repeat visits!

Fayez emphasizes that his service menu has evolved into the blend of Eastern Exotic treatments and North American traditions because of clients' demands for certain services that they experienced while on vacations. As a frequent traveler himself, Fayez researches their recommendations to ensure that his spa maintains its leading edge anti-aging, health, wellness, and beauty treatments.

Next May, Fayez Spa will be celebrating its 30th anniversary. It promises to be a very special event that will honour its roots, celebrate the

present, and chart the course for the future. Invitations will be emailed so now would be a good time to ensure that your correct email address is among the valued Fayez Spa client list.

Janine Tamba presents the Fayez Spa Nursing Excellence Award to Sharon Pierce at the Annual Nursing Week Gala held May 10 at London's Hellenic Community Centre. Fayez Tamba created the award in 2011 as a result of the care he received while he was a patient at LHSC-Victoria Hospital. His objective was to elevate the profile of the nursing profession by inviting patients or their families to nominate deserving nurses for demonstrating outstanding nursing care. Fayez observed that "the nursing profession is taken for granted and rarely appreciated for the invaluable physical and emotional care that they routinely provide".
